

**QUARTERDECK RESTAURANT (PALM BEACH AREA)
PHOTOS OF THE FIRST TESTING OF CHRISAL PRODUCTS.**

When the Mr. Justin Mezick, the manager of the Quarterdeck restaurant in West Palm Beach did not believe Chrisal could do the job stated, he had one of the restaurant's cleaning people start using Chrisal only on one part of the floor so they could see how it compared to their regular cleaning products.

The results were so astounding and the quality of cleaning with Chrisal so much better, easier (and then proved safer when tested) – as well as safe for bare hands, that soon Chrisal was tested and used in every area of the restaurant.

One amazing results was that the odor of stale beer where drinks were spilled on the rug went away – and the bathrooms became odor free with Chrisal.

However, look at the huge difference in the floor just by the second week..!

← **REGULAR CLEANING PRODUCTS USED ON THE TOP SECTION OF THE FLOOR**

← **WITH CHRISAL, NOT ONLY DID THE FLOORS CLEAN FAR BETTER, BUT THE ACTUAL "GROUT" BETWEEN THE TILES BECAME LIGHT AGAIN AS CHRISAL ELIMINATED THE DANGEROUS BIO-FILM THAT TRAPS DIRT, VIRUSES & DANGEROUS BACTERIA**

****IMPORTANT NOTE:*** *The laboratory cultures taken of areas before and after cleaning with Chrisal showed that using Chrisal PIP almost totally eliminated pathogens by the second week of use.*
