Dear Dr. Morris,

I received your request for an updated report on our use of Chrisal. When we started testing Chrisal in the first half of 2008, we were very cautious about trying new products. However, by July of 2008 we had been convinced of Chrisal's effectiveness, especially when we saw the results of the microbiological testing using the Culture Test Kits.

It now has been almost two years since we started using the Chrisal PIP products and we are totally delighted with how incredible they work and the safety they provide us.

You can see the difference in using the Chrisal PIP products compared to all other products. They make everything feel, look and smell much cleaner. In addition, it was incredibly reassuring to see the proof that every actual test culture showing a great improvement in the reduction of all contaminants and items of concern. We saw this same great result in all the other stores as well.

It is also reassuring to know that when we clean our tables and trays, we are now providing our customers with real, ongoing protection. As you know, our floors take a terrible beating not only from foot traffic, but from spilled foods as well. The Chrisal floor cleaner has done a remarkable job in not only keeping the floor clean, but in the ease in which it actually cleans. And, amazingly, our mops now stay white! Not only has your products worked much better than any others we have ever used, but Chrisal seems to protect and keep working between applications as cleaning now takes very little time and the facility sparkles.

The general cleaner is just that. We use it for everything including cleaning our bread ovens, which now clean up so much easier than before. We have been using the Chrisal sanitary cleaner in our bathrooms which cleans beautifully and now all the odors are gone any time you go in day or night. We also started using all the products at home because we were so impressed with the results and everyone loves the Allergy Free Spray as well.

I never thought we would rave about a cleaner, but these are so much more and we all really love your Chrisal products and are happy to indorse them to everyone. One other note is that all of us have noticed that the restaurant just smells better. The overall smell is always a clean one now, no matter how many people we have during rush hour.

As you know we had approval for this test and now that the results have been incredibly consistent for two years, we can recommend them to everybody. Chrisal also is economical. So, having a far better product that also saves us money is something hard not to love.

Sincerely

A handwritten signature in blue ink that reads 'Larry Cohen'.
